Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's election of species in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Canterbury et al(6,019,861) in view of Serizawa et al(6,368,432).

Canterberry discloses a gas generating composition that comprises a three oxidizer system of 35-80 % as well as binders and processing aids such as iron oxide and silicon. The processing aids are presnet in the amount of .5-5 %. The oxidizers include potassium nitrate,

ammonium perchlorate, and ammonium nitrate. The ammonium nitrate can be phase stabilized. The mixture of these three particular oxidizers is not disclosed.

Serizawa et al teaches the use of diphenylamine as a known stabilizer with a composition that comprises ammonium nitrate.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to select the particular oxidizers from the ones disclosed by Canterbury since it is suggested to use a three oxidizer system and also to vary the amounts of the three oxidizers within the range disclosed by Canterbury to achieve a desired result. It is well-settled that optimizing a result effective variable is well within the expected ability of a person of ordinary skill in the subject art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), *In re Aller*, 220 F.2d 454, 105 USPQ 233 (CCPA 1955). The oxygen balance is an inherent property of the composition of Canterbury. As to limitations which are considered to be inherent in a reference, note the case law of *In re Ludke*, 169 USPQ 563; *In re Swinehart*, 169 USPQ 226, *In re Fitzgerald*, 205 USPQ 594; *In re Best et al*, 195 USPQ 430; and *In re Brown*, 173 USPQ 685, 688. It would also have been obvious to use a stabilizer such as diphenylamine since Serizawa suggests that it can be used to prevent decomposition of the gas generating composition.

Allowable Subject Matter

5. Claim 11 is allowed.
